

PROGAL BLG

PROGAL BLG is developed to obtain a level surface specially for reactive dyed fabrics for natural `Stone` and `Khaki` shades. **PROGAL BLG** also improves the solubility of the dyestuff and therefore enables a homogenous dyeing on any concentration.

CHARACTERISTICS

Composition : Synergic combination of selected long chain polymers.
Appearance : Brown liquid
Sp. gr. : ~ 1,0
Ionic Char. : Nonionic & anionic combination
Solubility : It can be diluted even with cold water in any ratio

USING CONDITIONS and APPLICATIONS:

PROGAL BLG enables a level and level dyeing with composite fiber materials and difficult shades, which are dyed with reactive dye-stuff. One of the compromising advantages of **PROGAL BLG** is the fact it significantly enhances the brilliancy of the fabric. **PROGAL BLG** improves the rubbing fastnesses since the percentage of the unfixed dyestuff is being reduced significantly.

Recommended usage may differ according to requested handle, composition of fabric, but usually the concentrations given below will be sufficient to reach requested result.

	Dyeing	Leveling & Dispersing
Usage:	0,50 – 2,00	2,00 – 4,00 gr/lt
pH:	10,50 ± 0,50	9,50 ± 0,50
Soda ash:	-----	2,00 – 4,00 gr/lt
Temperature	60 ° C	60 ° C

STORAGE CONDITIONS:

Keep out of direct sunlight or freezing. It is stable for at least 6 months if stored in original packing and recommended storage conditions.
