

PROSTAT 2103

PROSTAT 2103 is a special formulated antistatic agent that gained antistatic effect to synthetic fabrics without reducing handle.

CHARACTERISTICS

Composition	: Phosphoric acid derivatives
Appearance	: Light yellowish viscous liquid
PH	: $6,0 \pm 0,5$
Ionic Char.	: Mildly cationic
Solubility	: Dissolves in water at any concentration.

USING CONDITIONS and APPLICATIONS:

PROSTAT 2103 is a non-yellowing softening agent under high temperatures and fixing condition. There is no degradation to antistatic effect while drying and fixing processes.

PROSTAT 2103 does not damage to washing and color fastness. **PROSTAT 2103** can be used with all softeners and finishing auxiliaries.

PROSTAT 2103 is used exhaust and foulard application for PES, PAC, triacetate and PA fabrics.

Recommended usage may differ according to requested handle, composition of fabric, hydrophilic of the towel / material etc, but usually the concentrations given below will be sufficient to reach requested result.

Foulard Applications

4,0 – 10,0 g/l **PROSTAT 2103**
At room temperature pick up : % 60–80

Exhaust Applications:

2,0 – 5,0 g/l **PROSTAT 2103**
At 40-50°C, 15-20 minutes

STORAGE CONDITIONS:

Keep out of direct sunlight or freezing. It is stable for at least 6 months if stored in original packing and recommended storage conditions.
