

## PROCREASE 3008 Plus

**PROCREASE 3008 Plus** is an easy care, non-iron finishing material, which can be used in cotton, viscose, linen, any synthetic fiber and their combination. It has a unique advantage of having the necessary catalyst inside and meets the Eko Tex 100 standards.

### CHARACTERISTICS

Composition	: Glyoxalin resin with catalyst
Appearance	: Transparent, slightly viscous liquid
pH	: $5,0 \pm 1,0$
Ionic Char.	: Cationic
Solubility	: Dissolves in every percentage with water

### APPLICATIONS

- **PROCREASE 3008 Plus** can be applied almost on any fabric.
- Since **PROCREASE 3008 Plus** has the necessary catalyst in the formulation, there is no need to add anything to the foulard bath and therefore has better stability.
- It is specially formulated to obtain extra low foaming in the process.
- **PROCREASE 3008 Plus** can be applied with most of the OBA's available on the market.
- **PROCREASE 3008 Plus** does not affect to light fastness as well as wet and dry rubbing fastnesses.

### USAGE:

According to the desired effect and the construction of fabric the using percentage may vary but generally below mentioned amounts will create satisfactory results.

Co	: 30 – 70 g/l
CO/VS	: 50 – 80 g/l
PES/Co	: 20 – 50 g/l
PES/VS	: 30 – 80 g/l

The application will be under strict pH control at pH:  $5,25 \pm 0,25$

### STORAGE CONDITIONS:

Keep out of direct sunlight or freezing. It is stable for at least 6 months if stored in original packing and recommended storage conditions.
