

PROSIL 1501 E

PROSIL 1501 E is a specifically developed for woven fabrics and has good antcreasing properties to all types off fibers. The silky handle of the fabric differs superior surface smoothness and hydrophilic character.

CHARACTERISTICS

Composition : Amino modified hydrophilic silicone with resins
Appearance : Off white viscous liquid
PH : $5,0 \pm 0,5$
Ionic Char. : Nonionic
Solubility : It can be diluted even with cold water in any ratio

USING CONDITIONS and APPLICATIONS:

PROSIL 1501 E with its low yellowing characteristic can be utilized in every finishing aspect on each different composition of fibers as well as regardless of fiber type. One of the compromising advantages of **PROSIL 1501 E** is the fact it significantly enhances the hydrophilicity of the fabric.

Recommended usage may differ according to requested handle, composition of fabric, hydrophilicity of the towel/material etc, but usually the concentrations given below will be sufficient to reach requested result.

	Padding
Usage:	40 – 60 gr / lt
pH:	$5,5 \pm 0,2$
Wet pick up: (WPU)	70 – 80 %
Temperature	-----

STORAGE CONDITIONS

Keep out of direct sunlight or freezing. It is stable for at least 6 months if stored in original packing and recommended storage conditions.
