

PROCLEAN 1703

PROCLEAN 1703 is special developed oil removing agent especially for paraffin wax and heavy oil stains.

CHARACTERISTICS

Composition	: Synergic combination of specially selected surfactants and emulgators
Appearance	: Transparent, slightly viscous liquid
PH	: $7,5 \pm 0,5$
Ionic char.	: Nonionic
Solubility	: Dissolves in every percentage with water

APPLICATIONS

- **PROCLEAN 1703** has a unique formulation of well balanced organic and inorganic substances, therefore cleans the fabric from almost any dirt in one process.
- **PROCLEAN 1703** is specially formulated to obtain extra low foaming in the process and.
- **PROCLEAN 1703** can be utilized to get rid of animal and vegetable oil based stains as well.
- **PROCLEAN 1703** can be utilized with peroxide, hypochlorite and chloride bleaching bath, in carbonization process, during the cotton dyeing, provide a good wetting and dispersing.
- **PROCLEAN 1703** has good hydrophilicity features.

Cellulose/synthetic mixture:

At desizing process with enzymes and washing of process for removing sizing agents which soluble at the water

Discontinuous scouring process ; 0,5-1,0 gr/lit

Pad-Batch bleaching with peroxide ; 0.5-1,0 gr/lit

Wool and their mixture:

Discontinuous scouring process ; 0,5-1,0 gr/lit

Pad-Batch bleaching with peroxide ; 0.5-1,0 gr/lit

For heavy oil removing:

If the stains' removing is hard to wash, firstly local washing with % 6 -12' lik

PROCLEAN 1703 solution and than washing with **PROCLEAN 1703** at

Continuous washing machine; 3,5-7,5 gr/lit

Discontinuous washing machine; 0,5-2,5 gr/lit

STORAGE CONDITIONS

Keep out of direct sunlight or freezing. It is stable for at least 6 months if stored in original packing and recommended storage conditions.
